Roshan Naik

Aspiring Software Developer | Proficient in React.js | JavaScript | SQL | Modern Web Technologies

8329501407 roshannaik88690@gmail.com LinkedIn GitHub Bhokar, India

PROFESSIONAL SUMMARY

Recent Bachelor of Computer Science graduate with hands-on experience in building responsive web applications using HTML, CSS, JavaScript, and React.js. Familiar with SQL and SQLite, REST APIs, JWT authentication, and Git/GitHub. Strong interest in software development with a willingness to learn and adapt to new technologies.

EDUCATION

MGM's College of CS & IT | Nanded — 2023 - 2026
Bachelor of Computer Science (BCS) — *CGPA : 7.71*

VJNT college , Kuntur | Kuntur , Naigoan — 2022 - 2023
Higher Secondary Education (HSC) — *CGPA : 65.50 %*

Shri Shahu Maharaj High-School | Bhokar — 2020 - 2021
Secondary School Certificate (SSC) — *CGPA : 76.00 %*

PROJECTS

Book Hub | △ Vercel Github — 2026 - 2026
React Developer
A responsive, authenticated book discovery and tracking web app that lets users browse top-rated books, search and filter titles across custom bookshelves (Read, Currently Reading, Want to Read), and view detailed book/author information — built with React, React Router, and JWT-based authentication.

- Built a React app with JWT login, protected routes, and auto-redirect for logged-out users
- Added search and filtering across bookshelves (All, Read, Currently Reading, Want to Read) using a REST API
- Created a book details page that loads data based on the URL using dynamic routing
- Built a responsive top-rated books carousel that adapts to desktop, tablet, and mobile
- Handled loading, success, error, and empty states cleanly across all pages
- Organized the app into reusable components (Header, Footer, protected routes) with React Router for navigation

Technologies / Tools Used : *React, React Router, JavaScript (ES6+), React Hooks (useState, useEffect), JWT Authentication, js-cookie, react-slick (Carousel), react-spinners, react-icons, HTML5, CSS3, REST API Integration*

Food Munch — 2026 - 2026
Frontend Developer
A fully responsive food delivery landing page with a hero banner, feature highlights, menu categories, and a payment/social section — built with semantic HTML and custom CSS.

- Built a responsive multi-section landing page using HTML5 and CSS3, with a mobile-first layout that adapts across breakpoints
- Created a flexible navigation bar and hero banner using Flexbox, with smooth in-page scroll links to each section
- Designed reusable card components (features, menu items) using CSS Grid/Flexbox for consistent spacing and alignment
- Implemented a two-column layout system (image + content) that reverses direction on different sections for visual variety
- Added payment method icons and social media links styled with custom CSS and inline SVGs

Technologies / Tools Used : *HTML5, CSS3, Flexbox, Responsive Web Design, Google Fonts, Font Awesome*

SKILLS

Programming Languages :	JavaScript (ES6+), HTML5, CSS3
Frameworks & Libraries :	ReactJS
Tools & Platforms :	Git, GitHub, VS Code, npm
Languages :	English, Hindi
Soft skills :	Strong stake holder, Eagerness to Learn
Databases :	SQLite
